

Worried about your cables & adapters growing legs?

Ensure your hardware stays where it's suppose to . Our cable tethers can be used for multiple different applications including securing display adapter to a cable, securing a flash drive, GoPro lanyard, safety cable, hanging a heavy picture, decoration, or creating a keychain. Protect your gear, save the organization money, and be the tech hero!

Our product is proudly made with quality US parts and assembled by a US military veteran.

Instructions:

1. Insert the looped end over the display adapter.
2. Insert the other looped end over the display cable.
3. Tighten both looped ends to ensure they are secure to the cable.
4. Crimp the sleeve with a pair of vise grip pliers or pliers from the top/flat part. Squeeze securely in multiple different places on the sleeve to ensure a good hold (recommend 4x evenly spaced with medium pressure). Repeat process on the other side.
5. You are now tethered.

Thank you
for purchasing the **Universal CableTether!**
